

Oceanological and Hydrobiological Studies

International Journal of Oceanography and Hydrobiology

Institute of Oceanography, University of Gdansk

Al. Pilsudskiego 46, 81-378 Gdynia, Poland

Guidelines for referees

Online manuscript review

We strongly encourage referees to submit their comments via our *Evaluation Form* attached to the manuscript files.

About *Oceanological and Hydrobiological Studies*

Oceanological and Hydrobiological Studies is an international quarterly review journal, which aims to provide timely, authoritative reviews that are of broad interest and of exceptional quality.

Criteria for publication

To be published in *Oceanological and Hydrobiological Studies* a manuscript should meet the following criteria:

- Timely, accurate and balanced
- Important to scientists in the specific field
- Interesting and accessible to researchers

Confidentiality

We ask referees to treat the review process as strictly confidential, and not to discuss the manuscript with anyone not directly involved in the review. It is acceptable to consult with laboratory colleagues, but please identify them to the editors.

Timing

Oceanological and Hydrobiological Studies is committed to rapid editorial decisions and timely publication, and we believe that an efficient editorial process is a valuable service both to our authors and to the readers. We therefore ask referees to respond promptly (normally within 10-14 days of receiving a manuscript, although this may be either longer or shorter by prior arrangement). If referees anticipate a longer delay, we ask them to let us know so we can keep the authors informed and, where necessary, find alternative referees.

Anonymity

We do not release referees' identities to authors or to other referees, except when referees grant permission to be identified.

Competing interests

In the interests of transparency, the *Oceanological and Hydrobiological Studies* journal have a competing financial interests policy. Referees are requested to exclude themselves in cases where there is a significant conflict of interest, financial or otherwise. However, financial interests do not necessarily disqualify a referee from evaluating a paper. Referees are asked to inform the editor of any interest which might be perceived as relevant — editors will then consider these statements when weighing referees' recommendations.
